Product description

SPARTUS® EASYTIG 9V / 17V torch with Valve

The SPARTUS® EasyTIG series offers classic welding handle solutions designed with simplicity and ergonomics in mind.

TORCH BODY

The torch body equipped with a valve allows for smooth adjustment of the gas flow according to specific welder requirements.

HANDLE

Thanks to the traditional round handle, the **EasyTIG handle with a valve** is significantly lighter, resulting in easier torch handling and reduced strain on the user.

CABLE PACKAGE

For EasyTIG handles with a valve and a round handle, we offer a rubber cover for the cable package, marked with the symbol D.

CONNECTIONS

Handles made with round handles are available with an SK25 or SK35 current connection, equipped with a two-meter hose and a 1/4" nut.

*The presented handle image in the article is for illustrative purposes and depends on the options selected in the configurator and related products.*
