

product code: SP050-01-010
product ean: 5900391246924

The wire feeder includes:

- single insulated steel liner
- single teflon liner
- 2 wire guide roller 1.2 - 1.6V fi37 (installed in the feeder)
- 2 wire guide roller 0.8 - 1.0V fi37

Product variants

Index	Price
Wire feeder [single] for the Easy laser welding machine SP050-01-010	€714.05 / pc VAT 23% €878.28 / pc
Wire feeder [double] for the Easy laser welding machine SP050-01-015	€1,190.24 / pc VAT 23% €1,464.00 / pc

Product description

SPARTUS® Single Wire Feeder - THE KEY TO PRECISION

The SPARTUS® wire feeder delivers essential welding material with unparalleled precision. This device is designed with professionals in mind, for whom control, quality, and work efficiency are paramount.

PRECISE WIRE DELIVERY

Thanks to advanced technology, the SPARTUS® wire feeder offers unprecedented accuracy in delivering wire to the welding area. This is the foundation for achieving perfect welding parameters, which directly translates to the quality and durability of the welds.

AUTOMATION FOR EFFICIENCY

Automating the wire delivery process significantly reduces the need for direct operator involvement. This allows welders to focus on the most important aspects of the job, such as controlling the welding process, thereby increasing the efficiency and quality of the final product.

EASE OF USE

The SPARTUS® wire feeder is characterized by an intuitive interface and ease of operation, which allows for quick training of operators.

VERSATILITY OF APPLICATIONS

The versatility of the wire feeder makes it an ideal solution for a variety of industrial applications, from precision assembly work to large-scale production, where quality and precision are invariably important.

The SPARTUS® wire feeder not only offers advanced technology and reliability but also contributes to significant optimization of production processes, improving both the quality and efficiency of work.
