

product code: **EASYMIG130-PAK-15-3**

product ean: **5900391245873**

Package equipment:

- EasyMIG 130
- MIG gun 150
- wire guide roller 0.8 - 0.9R fi25
- work clamp
- shield
- hammer with a brush
- shoulder strap
- user's manual

EASYMIG130-PAK-15-3

Product description

EasyMIG 130 - LIGHTWEIGHT MIG WITH SELF-SHIELDED WIRE

SPARTUS® EasyMIG 130 is a compact welder, built on IGBT transistors. It is designed for flux-cored arc welding (FCAW). It is the perfect solution for anyone looking for a convenient welding option at home or in a small workshop.

The main advantages of the machine include:

- **Adjusted Performance:** With a maximum welding current of 130A, EasyMIG 130 provides enough power for most home projects and workshop tasks.
- **Power Supply from a Socket:** The device operates on a single-phase 230V network, meaning it can be used whereas an access to standard power supply.
- **Simple Wire Feeder:** A two-roller feeder for a 1kg/100mm spool makes it easy to handle and ensures smooth wire feeding.
- **MIG150 Welding Torch:** The permanent attachment of the MIG150 torch means the machine is always ready to work, facilitating quick start-up of welding.
- **Welding Modes:** There are two welding modes available - a synergic mode that automatically adjusts welding parameters, and a manual mode that allows for customization of settings to specific project requirements, increasing the device's flexibility.
- **2T/4T Function:** Provides comfort during longer work, minimizing hand fatigue.
- **Self-Shielded Wire Welding:** The ability to weld without the need for protective gas is a major plus for users

looking to reduce additional costs. Additionally, the elimination of external gas bottles significantly increases the device's mobility, facilitating work in hard-to-reach locations, windy conditions or outdoors.

SPARTUS® EasyMIG 130 is an easy-to-use welder, perfectly suitable for home tasks, repairs, or hobby projects. It is the ideal solution for those seeking a practical tool without unnecessary complications. With **EasyMIG 130**, a wide range of projects can be implemented, which come with low operating costs.

Technical details

Input	~1× 230V ± 10% 50 / 60 Hz
MIG welding current	10 - 130A
MIG duty cycle	30%
Output working voltage	20.5V
Wire feeder	built-in, 2-roll gear
Welding wire spool	≤ 1kg / Ø100mm
Wire diameter	0.8mm
Synergy	yes
2T/4T Control	yes
Additional MIG functions	manual adjustment of parameters
Current consumption	23A
Power factor (cosφ)	0.65
Efficiency η	78%
Insulation class	H
Protection class	IP21S
Weight	5kg
Dimensions	350x140x220mm
