

product code: **NW9-CSB-24-KPL**

The set includes:

- insulator
- collet
- gas lens
- CUP Black #11 nozzle with strainer
- CUP Black #13 nozzle with strainer
- CUP Black #15 nozzle with strainer
- CUP Black #17 nozzle with strainer
- set of 4 spare strainer

Product variants

Index	Price
CUPSystem Black - 9/20 set [electrode 2.4] NW9-CSB-24-KPL	€114.92 / pc Net price
CUPSystem Black - 9/20 set [electrode 1.6] NW9-CSB-16-KPL	€114.92 / pc Net price

Product description

The **CUPSystem Black** set is a versatile and advanced TIG welding solution that currently provides the most effective gas shielding during TIG welding.

The cup-shaped gas nozzle and precise strainers ensure an equal distribution of the gas shield which is crucial for achieving perfect metal connections. The inclusion of black nozzles with an advanced gas flow direction system further enhances the effectiveness of the gas shield, promoting higher quality welds. The inclusion of black nozzles with an advanced gas flow direction system further enhances the effectiveness of the gas shield, achieving higher quality welds.

The aspect of distributing gas in four directions not only provides better coverage but also effectively cools the weld area, reducing the likelihood of oxidation at the joint's edges.

This comprehensive approach to improving gas distribution and cooling during welding could significantly impact the efficiency and quality of welding projects, making the CUPSystem Black set a valuable tool for welders seeking precision and reliability in their work.
