## Product description

**Narrow-Gap-Welding kit** is designed to work in hard-to-reach areas. Its special construction and the shape of the gas nozzle ensure excellent visibility of the weld and minimal spatter adhesion, eliminating the need for anti-spatter agents.

This kit is compatible with standard water-cooled MIG-MAG welding torches, such as models 401 and 501, as well as gas-cooled torches, like model 360.
