

product code: **SP030-05-303**  
product ean: **5900391249529**

**Standard equipment:**

- 2 Vortex Eco 160 extraction arms 3m
- AirMaster Duo mobile air ventilation system

**Additional paid options:**

- EC motor

Order fulfillment time - 4 weeks

Made in EU

## Product variants

## Product description

### Mobile Welding Fume Extractors SPARTUS® AirMaster Duo

**AirMaster Duo** is a mobile air filtration system designed to remove dust and fumes that often occur during welding processes. By utilizing two Vortex Eco extraction arms, the device allows for effective elimination of contaminants from two workstations. The **AirMaster Duo** filter components include a metal pre-filter and a modular main cartridge that can be easily replaced.

- **Dual filtration:** Two stages of filtration effectively eliminate contaminants from the air.
- **High performance:** Filtration capacity of 850 m<sup>3</sup>/h for each of the two workstations ensures efficient air cleaning.
- **Full mobility:** The housing equipped with wheels (including two swivel wheels) ensures ease of movement.
- **Filter contamination indicator:** Allows for quick determination of when the filter needs cleaning or replacement.
- **Easy maintenance:** Simple access to filter cartridges facilitates their replacement and maintenance.

Applications:

- Welding work that does not require continuous extraction
- Work at repair stations
- Local ventilation (except for corrosive and aggressively acting fumes or chemical gases)
- Removal of light air pollutants
- Protecting workers' health and improving working conditions
