Product description

SPARTUS® exhaust fans

SPARTUS® exhaust fans are designed to work with extraction devices and systems that remove contaminated air. Their aluminium rotors placed in metal coverings ensure high flow efficiency and a spark-free design. SPARTUS® fans are intended for transporting non-explosive and chemically non-aggressive gases at temperatures up to 40°C. These devices excel at removing smoke or dust, especially in universal localized extraction systems, with retractable exhaust duct mechanisms or slotted duct extracts.
