## Product description

### Vortex extraction arms

Vortex arms are modern technological solutions in air pollution elimination, capturing contaminants directly at their source. Their innovative design features rotating bases, tubes made of smooth steel, a versatile suction cup nozzle with a functional handle, and an adjustable throttle for air flow control. Thanks to these features, **Vortex** arms have set new standards in ventilation.

- **Smooth steel** - minimizes flow resistance and reduces noise levels, while also preventing the buildup of contaminants.
- **External joints** - allow for easy adjustment without interrupting work.
- **Long-lasting performance** - Vortex arms are designed for continuous use, making them an ideal choice for high-demand environments.

## Technical details

<b>Model</b>	<b>Hanging</b>
<b>Reach</b>	<b>2m</b>
<b>Diameter</b>	<b>160mm</b>
<b>Nozzle</b>	<b>315mm</b>

---

<b>Flow</b>	<b>900-1400 m<sup>3</sup>/h</b>
<b>Input</b>	-
