Grinding station with lower and rear extraction  
SP034-00-050

Product description

Grinding station with lower and rear extraction

**Grinding stations with extraction systems** are professional tables designed to provide protection during intensive grinding in industrial conditions. They should be connected to a local ventilation system that expels contaminated air outside or to a specialized filtration device.

- **Interchangeable worktop:** Allows for easy adaptation to various tasks.
- **Dust drawers:** Help maintain cleanliness and order.
- **Foldable side shields:** Provide additional protection and configuration flexibility.
- **Extraction through the rear wall and worktop:** Increases the efficiency of removing dust and other pollutants.

Technical details

Flow	1500 m³/h
Max. load capacity	100 kg
Dust drawe	2 x 17 l
Dimensions	864 x 1150 x 800 mm
Weight	160 kg
