## Product description

### Grinding station with lower and rear extraction

**Grinding stations with extraction systems** are professional tables designed to provide protection during intensive grinding in industrial conditions. They should be connected to a local ventilation system that expels contaminated air outside or to a specialized filtration device.

- **Interchangeable worktop:** Allows for easy adaptation to various tasks.
- **Dust drawers:** Help maintain cleanliness and order.
- **Foldable side shields:** Provide additional protection and configuration flexibility.
- **Extraction through the rear wall and worktop:** Increases the efficiency of removing dust and other pollutants.

## Technical details

<b>Flow</b>	<b>1500 m<sup>3</sup>/h</b>
<b>Max. load capacity</b>	<b>100 kg</b>
