**High-Performance rotary burrs** are designed to meet the most demanding applications in the machining industry. Thanks to the TiAlN coating, HP rotary burrs are highly resistant to high temperatures and oxidation. This coating provides the rotary burrs with exceptional hardness. These rotary burrs are especially recommended for use with hard steel alloys.

## Technical details

Type	cylinder
Diameter of the working part (D1)	10mm

The length of the working part (L2)	20mm
Total length (L1)	65mm
Pivot diameter (D2)	6mm
Use	for general use (especially for hard metal steel alloys)
