High Performance Milling Cutters have been designed to meet the most demanding applications in the machining industry. Thanks to the TiAlN coating, HP cutters are highly resistant to high temperatures and oxidation. This coating provides the cutters with exceptional hardness. These cutters are especially recommended for working with hard steel alloys.

Technical details

Type	cylinder
------	----------

Diameter of the working part (D1)	12,7mm
The length of the working part (L2)	25mm
Total length (L1)	70mm
Pivot diameter (D2)	6mm
Use	for general use (especially for hard metal steel alloys)
