SPARTUS LaserFrost 5l coolant SP050-90-005	€35.69 / pc VAT 23% €43.90 / pc

Product description

SPARTUS® LaserFrost coolant has been specially developed to meet the challenges posed by the working conditions of laser welders. Thanks to its advanced formula, the cooling systems maintain their maximum efficiency even at low temperatures down to -18°C. This is crucial for maintaining continuous operation and performance of the equipment, which is especially important in heavily exploited industrial environments.

SPARTUS® LaserFrost not only provides protection against freezing but also effectively protects the metal components of the cooling systems against corrosion. It is an ideal solution for users of laser welders who need a reliable and durable product to protect their machines in harsh conditions.

SPARTUS® LaserFrost coolant is easy to use and does not require special procedures during replacement or replenishment of the system, making it user-friendly for both experienced operators and those who are just starting to work with advanced cooling systems in laser technology.
