

product code: **E-7018-32-100**
product ean: **5900391252482**

SPARTUS® electrodes are vacuumsealed and multi-layer protected to effectively prevent moisture absorption.

Standards:

EN 13479
EN ISO 2560-A - E 42 4 B 32 H5
SFA/AWS A5.1 : E7018 H4R

Approvals: TÜV, DB

Product description

Basic carbon steel electrodes 7018 H4R

The 7018 H4R electrode is a reliable basic electrode with moisture resistance and low hydrogen content. It is designed for high-quality welds in demanding applications such as the construction of boilers, pressure vessels, and working pipelines.

Key advantages:

- **High weld quality** – crack- and pore-free welds.
- **Stable arc** – focused and easy to control, enabling smooth operation.
- **Easy slag removal** – faster work and cleaner results.
- **Excellent positional performance** – perfect for welding in all positions.
- **Crack resistance** – strong joints, even under dynamic loads.

Applications:

- Welding of low-alloy and high-strength steels
 - Components subjected to high stresses and mechanical loads
 - Structures exposed to high temperatures
 - Pressure vessels, pipelines, boilers
 - Machine frames, cement plants, heavy-duty equipment
-
