

Product details: Welding rod AlMg5 ER5356 1.6mm
2.5kg

nov-Weld

product code: T-5356-16-250
product ean: 5900391253199

Standards:

EN 13479
EN ISO 18273-S Al 5356
SFA/AWS A5.10:ER5356

Approvals: DB

Product description

SPARTUS® AlMg5 ER5356 welding rod

The SPARTUS® AlMg5 ER5356 welding rod is a top-quality product designed for welding aluminium-magnesium alloys. Thanks to its excellent mechanical properties and high corrosion resistance, this rod is perfectly suited for a wide range of industrial and structural applications.

Advantages:

- Professional weld quality.
- Easy application and stable welding arc.
- Ideal for demanding projects and aluminium constructions.

Key Features

- **High magnesium content** – provides excellent mechanical strength and corrosion resistance.
- **Aesthetic welds** – smooth and durable joints, perfect for projects requiring a high-quality finish.
- **Resistance to harsh conditions** – performs exceptionally well in corrosive environments, especially in the marine industry.

Applications:

- **Welding aluminium-magnesium alloys** – excellent for welding 5000 series alloys.
- **Corrosion-prone structures** – ideal for use in marine and humid environments.

- **Industrial production** – used in construction, automotive, shipbuilding, and aerospace industries.

Technical details

Intended Use	aluminum
Type	AlMg5 ER5356
Rod diameter	1.6mm
Weight	2.5kg
