Product description

SPARTUS Protektor - EFFECTIVE ANTI-SPATTER PROTECTION

SPARTUS Protektor is a silicone-free anti-spatter agent designed to protect contact tips, gas nozzles, torch components, and welded surfaces from adhesion and fusion of welding spatter. It effectively safeguards equipment and workpieces, improving the quality and cleanliness of the welding process.

SAFE AND ECO-FRIENDLY FORMULA

SPARTUS Protektor contains no silicone, organic solvents, or nitrites, making it safe for the operator and the environment. The product is non-flammable, biodegradable, and enriched with corrosion inhibitors, providing additional protection for treated components.

DEGREASING ACTION

Its degreasing ingredients allow the elimination of a separate degreasing step before painting or galvanizing. This solution significantly speeds up surface preparation and increases the efficiency of the entire technological process.

EASY TO USE

Application is quick and simple – just apply a thin layer to the surface before welding. After finishing the work, remove

loose spatter using a cloth or brush.
