Sharpener D91 for tungsten electrodes SP147-00-001B	€459.74 / pc Net price

Product description

The **D91 sharpener** enables precise and efficient sharpening of the tungsten electrode tip according to the technological requirements.

Electrodes sharpened with D91 sharpener present, among other things, an extended service life and allow easier arc welding. The sharpener enables sharpening of electrodes **with diameters of 1.6 to 4.8 mm at an angle from 10° to 60°**.

Built-in depth checker allows to select the right depth of sharpening and ensures repeatability of the process. Ability to displacement the electrode with regard to the surface of the grinding wheel significantly increases the life of the blade – which results in lower operating costs.

Standard sharpener is equipped with a clamping sleeve for electrodes with a diameter of 2.4mm and a basic grinding wheel. It is possible to purchase clamping sleeves for other diameters and diamond wheels.

Technical details

Input	~1× 230V ± 10% 50 / 60 Hz
Power	60W
Grinding angle	10 - 60°
Electrode diameter	1.6, 2.0, 2.4, 3.2, 4.0, 4.8mm
Grind segment diameter	90mm
Vibration level	<4m/s ²
Noise level	<60dB(A)
