

## Product variants

### Index

**SPARTUS® screw compressor with a tank [315 3kW 400V 10bar]**  
**SP4A-315-200-10**

**SPARTUS® screw compressor with a tank [315 2,2kW 400V 7,5bar]**  
**SP3A-315-200-7.5**

## Product description

The compressors of the SP3A and SP4A series are universal devices, with a simple design, for use in small plants, where the most important thing is low operating costs and reliable work. The use of low-power electric motors and low-speed screw modules resulted in increased durability of the moving parts.

Advantages of the device:

- low-noise operation (67-72 dB),
- belt drive enabling easy modification of performance and maximum pressure by changing the pulley ratios,
- simplified access to maintain the airend,
- microprocessor controller with idle run function,
- low weight,
- the possibility of installing the compressor on wheels or on shock absorbers,
- reliable screw airends by global manufacturers (GHH RAND) designed for continuous operation,
- asymmetric design rotor's profiles to generate maximum power and performance at minimum energy cost.

## Technical details

Pressure	10bar
Capacity	315l/min
Power	3kW
Drive	direct
Loudness	73dB
Plug	1/2"
Weight	135kg
Dimensions	1550x570x1100mm
Tank	200l
