Product description

Easy to use and high mobility are the undoubted advantages of SPARTUS® roller rotators. They are dedicated to rotating pipes and cylinder-shaped elements. The use of rotators significantly improves the precision of machining, which affects the high quality of welds, while reducing the working time.

Advantages:

- inverter-based control
- three-phase motor
- rollers covered with polyurethane with a hardness of 92°ShA
- foot switch to start and stop rotation

Technical details

Load capacity	1500kg (750kg per section)
Linear speed	120 - 1200mm/min
Workpiece diameter	20 - 800mm
Roller diameter	200mm
Input	~3× 400V ± 10% 50 / 60 Hz
