Product description

SPARTUS® rotator for curved tubes is designed especially for cylindrical parts and tubes, the rotation of which is more complicated. Perfect for processing pipe flanges, elbows and cylindrical elements with an eccentricity.

Advantages:

- smooth operation
- use of a pressure roller
- ground connection to the welding machine

With additional payment, it is possible to use of polyurethane coated rollers, adjusting the rotational speed to individual needs and installing an additional stand for the welding holder.

Technical details

Load capacity	650kg
Linear speed	100 - 1000mm/min
Workpiece diameter	40 - 650mm
Roller diameter	200mm
Input	~3× 400V ± 10% 50 / 60 Hz
