## Product description

Long and wide elements require specialized processing equipment, where SPARTUS® double-column two-axis rotary welding positioner are irreplaceable. The use of this class of equipment significantly increases the level of work safety and reduces its time. They are perfect for welding tanks, pressure vessels and trailer frames. It is possible to adjust the mounting brackets and the control interface to the individual needs of the customer.

*Accessories available: columns in the mobile version, runways, rotation drive on both columns, nut wear sensor, laser rangefinders, automatic cable winders.*

## Technical details

Load capacity	1000kg
Max. diameter of the element	3000mm
Rotation speed	0,12 - 1,2r/min
Height range	500 - 1600mm
Input	~3× 400V ± 10% 50 / 60 Hz
