DESCRIPTION

The SPARTUS® WRC400 water cooler is designed to cool welding torches. It is characterized by high performance. The 9 liter coolant vessel is equipped with a coolant level gauge. It is powered from single phase 230V source power.

SPARTUS® WRC400 water cooler is compatible with most of the branded welding torches, thanks to the use of quick coupler (standard 21) on the inlet and outlet.

SPARTUS® water cooler that high quality, maintenance-free unit, guarantees tightness. This is dependable and irreplaceable source of cooling systems.
