INFORMATION

HIGH QUALITY

The use of the highest quality materials in the production of the mask ensures not only safety, but also comfort and easy maintenance of the product's cleanliness.

COMFORT

Flexible and adjustable straps make it easy to adjust the mask to any face shape. This ensures that the product is comfortable and does not restrict movement.

ERGONOMICS

The ergonomic shape of the SPARTUS® mask provides a wide field of vision and allows unrestricted head movement.

HIGH PROTECTION

Thanks to the wide polycarbonate visor, the mask provides complete facial protection. Additionally, a quick fit test allows for professional fitting and sealing.

FILTRATION

The double filtration used in the mask reduces breathing resistance and balances the weight of the respirator. The replaceable filters make the mask a reusable product suitable for various types of hazards. The bayonet mount of the filters allows for easy and quick replacement.
